- Desktop applications;
- Mobile applications;
- Information systems;
- Security systems;
- Firmware solutions;
- Electronic commerce;
- Social networks;
- Economic and financial applications;
- Linux (Mono) programming.

## How to start working with us?

To start working with us you may just call us or send a free-form email specifying what you need. After that our manager will contact you for details. Our analysts will evaluate your task, work out the optimal ways of its performance, choose the necessary technologies and development environment and estimate the scope of work as well as the terms required for its fulfillment.

We may offer you 2 business models: 1. "Fixed price" it means that we evaluate the work you need to be done on the basis of a requirement specification and undertake to fulfill it for a set price and within a specified time; 2. Job at a rate (hourly) in this case you pay for the hours of work of our programmers, managers, testers, etc. Each option has its advantages and disadvantages. You have to choose on the basis of the project specifics, our recommendations and your own decision.

## Project progression

- **Step 1.** You apply to us and define your task;
- **Step 2.** Our business analysts draw up an optimal solution, and then depending on the task formalization they offer a business model and estimate its cost and time for completion. At this stage we hold negotiations and clarify all the issues necessary for commencing the works.
- **Step 3.** Architects and designers work out or revise the requirement specification and choose the technologies and development environment.
- **Step 4.** Formation of a working team: project manager, designers and testers.
- **Step 5.** Coding and modular testing.
- **Step 6.** Comprehensive testing.
- **Step 7.** Elaboration of the technical and in-line documentation.
- **Step 8.** Project handing-over.
- **Step 9.** Maintenance (if required)
